Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Weber et al. (French Patent No. 2,596,334). Weber et al shows the use of a frame (4) with a flexible support element (3,5) attached thereto. A Bowden cable (8) is connected to the flexible supporting element by at least one spring (9) to allow a pair of side ends (see Fig. 2) to move toward one another. Weber et al. shows the use of a plurality of guide rods (3) connecting the flexible support element to the frame along with a plurality of sliding elements (7) connecting at least one of the flexible support element ends to the plurality of guide rods. Weber et al. further shows the use of a restoring spring (mounted to the grid (3) at the corners as shown in Fig. 1) along with a first (or upper) and second (or lower) transverse strut connected to the frame (Fig. 1). Regarding claim 19, the transverse struts are the wires of the grid (3) whereby the guide rods are attached thereto to form the grid.

Allowable Subject Matter

3. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable over the prior art made of record if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
